The Traditional Fair Chitra – Vichitra Mela

The fair is held a fortnight after Holi, around the month of March-April. It starts on the eve of the new moon (called Amavas), the time when the wheat crop is ready for harvest.

Each year the Chitra Vichitra Fair plays itself out within the limits of the village Gunbhakhari in the border area of the Sabar Kantha district adjoining Rajasthan, 32 kms away from the nearest railway station of Khedbrahma. The main temple of the fair is situated on a picturesque site called the Triveni Sangam, the sacred confluence of the three rivers Sabarmati, Akul and Vyakul, amid the foothills of the Aravallis.

The name of the fair is derived from two brothers Chitravirya and Vichitravirya, sons of King Shantanu, and step brothers of Bhishma, from the story of the Mahabharata. There is a belief that they had settled here and were cured of their diseases by the waters of this site.

The fair is one of the most important fairs of the Adivasis in the region, and attracts about 60,000 people, most of them hailing from the Garasia and Bhil communities. People from many far away and distant villages arrive here. The fair is so popular that in 25 to 30 surrounding villages all the houses are deserted for the duration of the fair as every able-bodied person visits it. This fair is also a great opportunity for tribal men to meet prospective partners for marriage. Numerous couples have been known to elope directly from the fair site.

FOREWORD

1. The District Census Handbook (DCHB) is an important publication of the Census Organization since 1951. It contains both Census and non-Census data of urban and rural areas for each District. The Census data provide information on demographic and socio-economic characteristics of population at the lowest administrative unit i.e. of each Village, Town and Ward of the District. The Primary Census Abstract (PCA) part of this publication contains Census data including data on household amenities collected during 1st phase of the Census i.e. House Listing and Housing Census. The non-Census data presented in the DCHB is in the form of Village Directory and Town Directory contain information on various infrastructure facilities available in the village and town like; education, medical, drinking water, communication and transport, post and telegraph, electricity, banking and other miscellaneous facilities. Later on, the telegraph services were closed by the Government of India on 15th July, 2013. The data of DCHB are of considerable importance in the context of planning and development at the grass-root level.

2. In the 1961 Census, DCHB provided a descriptive account of the District, administrative statistics, Census tables and Village and Town Directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to Village and Town Directory, Part-B to Village and Town PCA and Part-C comprised analytical report, administrative statistics, District Census tables and certain analytical tables based on PCA and amenity data in respect of Villages. The 1981 Census DCHB was published in two parts: Part-A contained Village and Town Directory and Part-B the PCA of Village and Town including the SCs and STs PCA up to Tehsil/Town levels. New features along with restructuring of the formats of Village and Town Directory were added. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent Village, the distance in broad ranges from the nearest place having such an amenity, was given.

3. The pattern of 1981 Census was followed by and large for the DCHB of 1991 Census except the format of PCA. It was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 Census. In addition, sex wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 Census was the Community Development Block (CD Block) level presentation of Village Directory and PCA data instead of the traditional Tehsil/ PS level presentation.

4. As regards DCHB of 2001 Census, the scope of Village Directory was improved by including some other amenities like banking, recreational and cultural facilities, newspapers & magazines and most important commodity manufactured in a Village in addition to prescribed facilities of earlier Censuses. In Town Directory, the statement on Slums was modified and its coverage was enlarged by including details on all slums instead of 'notified slums'.

5. The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. These newly added amenities are: Pre-Primary School, Engineering College, Medical College, Management Institute, Polytechnic, Non-formal Training Centre, Special School for Disabled, Community Health Centre, Veterinary Hospital, Mobile Health Clinic, Medical Practitioner with MBBS Degree, Medical Practitioner with no degree, Traditional Practitioner and faith Healer, Medicine Shop,

Community Toilet, Rural Sanitary Mart or Sanitary Hardware Outlet in the Village, Community Bio-gas, Sub Post Office, Village Pin Code, Public Call Office, Mobile Phone Coverage, Internet Cafes/Common Service Centre, Private Courier Facility, Auto/Modified Autos, Taxis and Vans, Tractors, Cycle-pulled Rickshaws, Carts craven by Animals, Village connected to National Highway, State Highway, Major District Road and other District Road, Availability of Water Bounded Macadam Roads in Village, ATM, Self-Help Group, Public Distribution System (PDS) Shop, Mandis/Regular Market, Weekly Haat, Agricultural Marketing Society, Nutritional Centers (ICDS), Anganwadi Centre, ASHA (Accredited Social Health Activist), Sports Field, Public Library, Public Reading Room, Assembly Polling station, Birth & Death Registration Office. In the Town Directory, seven Statements containing the details and the data of each Town have been presented viz.; (i) Status and Growth History of Towns, (ii) Physical Aspects and Location of Towns, (iii) Civic and other Amenities (iv) Medical Facilities, (v) Educational, Recreational & Cultural Facilities, (vi) Industry & Banking and (vii) Civic & other amenities in slums respectively. CD Block wise data of Village Directory and Village PCA have been presented in DCHB of 2011 Census as presented in earlier Census.

6. The data of DCHB 2011 Census have been presented in two parts, Part-A contains Village and Town Directory and Part-B contains Village and Town wise Primary Census Abstract. Both the Parts have been published in separate volumes in 2011 Census.

7. The Village and Town level amenities data have been collected, compiled and computerized under the supervision of Shri Manish Bharadwaj, I.A.S., Directorate of Census Operations, Gujarat. The task of Planning, Designing and Co-ordination of this publication was carried out by Dr. Pratibha Kumari, Assistant Registrar General (SS) under the guidance & supervision of Dr. R.C.Sethi, Ex-Addl. RGI and Shri Deepak Rastogi present Addl. RGI, Shri A.P.Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Shri A.K.Arora, Joint Director of Data Processing Division under the overall supervision of Shri M.S.Thapa, Addl. Director (EDP) provided full cooperation in preparation of record structure for digitization and validity checking of Village and Town Directory data and the programme for the generation of Village Directory and Town Directory including various analytical inset tables as well as Primary Census Abstract (PCA). The work of preparation of DCHB 2011 Census has been monitored in the Social Studies Division. I am thankful to all of them and others who have contributed to bring out this publication in time.

P r e f a c e

I am deeply indebted to all the officers of Gujarat Government for their unstained support and cooperation at all stages of Census 2011. I am grateful to Shri A.K.Joti, then Chief Secretary, Shri Aloriya, Chief Secretary of Gujarat State, Shri V.N.Maira, then Additional Chief Secretary, Ms. S.Aparna, Principal Secretary and Shri A.D.Patel, Joint Secretary of General Administration Department (Planning) for their prompt response, guidance and cooperation to Census Organization. They infused a sense of urgency and seriousness in the minds of officer of the district administration, which geared up the entire administrative machinery. Cooperation received from then Under Secretary Shri J.T.Malvi, then Section Officer Kum N.M.Muni, and Section Officer Shri H.C.Dave, General Administration Department (Planning). I would like to thanks Shri R.N.Pandya then Director and Shri S.K.Hudda, Director of Economics & Statistics for their great support.

District Census Handbook Unit of Gujarat is a joint exercise of the Government of Gujarat and the Census Organization of the Government of India. In the preparation of the DCHB, the role played by Census Organisation is that of Census data collection, scanning of collected information, validation, compilation and analysis of data. DCHB Unit of the State Government collected the basic non-census information relating to amenities and infrastructures available in the village of the district. Apart from bearing the cost of this publication, all the official of different departments of the State Government extended whole hearted co-operation for accomplishing the task. Most of the data supplied by the various departments were cross-checked and an attempt was made to reconcile the discrepancies as well in order to get the final figures.

The District Collector, the District Development Officer, District Statistical Officer, District Information Officer and their staff member extended their warm and whole hearted co-operation for carrying out field work of the census and collection of non-census data for the District Census Handbook.

I am deeply grateful to Dr. C.Chandramouli, I.A.S., the Registrar General and Census Commissioner, India for the benefit I have derived by the way of guidance and advice. I also express my thanks to Shri Deepak Rastogi present Addl. RGI, Shri P.K.Banerjee, Deputy Registrar General (C&T), Shri A.P.Singh, Deputy Registrar General (Map), Dr. Pratibha Kumari, Assistant Registrar General (SS), Shri M.S.Thapa, Addl. Director (EDP), Shri A.K.Arora, Joint Director (EDP) and Shri Mahipal Singh, Assistant Director (SS) for providing technical guidance in finalizing this publication.

Shri Manish Bharadwaj, I.A.S., who held the office of Director of Census Operations, Gujarat had guided the operations of the 2011 Census. The data presented in this handbook were collected and compiled under the direction and guidance of Shri Manish Bharadwaj. However, he was repatriated to the State Government before this volume could be made available for the press.

At state Office, Shri R.R.Pandya, Joint Director, Shri M.R.Raol, Deputy Director, Kum S.B.Parmar, Research officer, Shri J.B.Panchal, Research Officer, Shri P.C.Khandhadia, Section Officer, Smt. K.B.Panchal, Research Assistant of District Census Handbook Unit and their team of able assistant meticulously collected and scrutinized the non-census data from various sources and prepared draft to DCHB etc. with the help of Census section. The other

officials of DCHB Unit, who scrutinized, edited and supervised the work of DCHB, have been mentioned in the “Acknowledgement”.

Of this Directorate I would like to extend my sincere thanks to Shri R.S.Meena, DRG (C&T), who had played major role in Census 2011 of Gujarat. Dr. Bhaveshkumar P. Mehta, Joint Director (EDP) and his team of devoted workers deserve all praise for timely processing of Household Schedules through Intelligent Character Recognition technology. Smt.V.A.Warade, Deputy Director, Shri Ramsingh Meena, Deputy Director and Shri S.Lingasamy, Deputy Director who were assisted by Dr. Sanchita Sarkar, Assistant Director and her team of dedicated worker deserve all praise for their perseverance and dedication in preparing the publication. The maps provided in the DCHB are prepared by the Map Section of the Census Directorate under the supervision of Dr. R.K.Sharma, R.O. (Map). I am thankful to all of them.

I am also thankful to all the Census Staff who provided assistant directly or indirectly in finalizing data at every stage and for final scrutiny of this publication.

History and Scope of the District Census Handbook

The need of data at the grass root level for the administrative and planning purposes at sub micro level as well as academic studies prompted the innovation of District Census Handbook. District Census Handbook is a unique publication from the Census organization which provides most authentic details of census and non-census information from village and town level to district level. The District Census Handbook was firstly introduced during the 1951 Census. It contains both census and non-census data of urban as well as rural areas for each district. The census data contain several demographic and socio-economic characteristics of the lowest administrative unit i.e. of each village and town and ward of the district. The non-census data comprise of data on availability of various civic amenities and infrastructural facilities etc. at the town and village level which constitute Village Directory and Town Directory part of the DCHB. The data of DCHB are of considerable importance in the context of planning and development at grass-root level.

In 1961 census DCHB provided a descriptive account of the district, administrative statistics, census tables and village and town directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was published in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tehsil/ town levels. New features along with restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given.

The pattern 1981 census was followed by and large for the DCHB of 1991 Census except the format of PCA. It was restructured. Nine- fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD Block) level presentation of village directory and PCA data instead of the traditional tehsil/ taluk/ PS level presentation.

As regards DCHB of 2001 Census, the scope of Village Directory was improved by including some other amenities like banking, recreational and cultural facilities, newspapers & magazines and most important commodity manufactured in a village in addition to prescribed facilities of earlier censuses. In Town Directory, the statement on Slums was modified and its coverage was enlarged by including details on all slums instead of 'notified slums'.

The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. In the Town Directory, seven Statements containing the details and the data of each town have been presented viz.; (i) Status

and Growth History of towns, (ii) Physical Aspects and Location of Towns, (iii) Civic and other Amenities, (iv) Medical Facilities, (v) Educational, Recreational & Cultural Facilities, (vi) Industry & Banking and (vii) Civic & other amenities in Slums respectively. CD Block wise data of Village Directory and Village PCA have been presented in DCHB of 2011 census as presented in earlier census. The data of DCHB 2011 Census have been presented in two parts, Part-A contains Village and Town Directory and Part-B contains Village and Town wise Primary Census Abstract. Both the Parts have been published in separate volumes in 2011 Census.

Brief History of the District

District as such came into existence in 1949 by merger of 29 princely states and named as Mahi Kantha. Himatnagar, the headquarters of the district was originally founded in 1426 AD. Later on, in the memories of Maharaja Himatsinhji of Idar, Himatnagar developed. Prior to it, Idar used to be the Capital of the district during the period of Parihar Rajput and dynasty of Raos.

The district derives its name from the Sabarmati River which flows on the northern and western borders. But in the early historic times, the region was known as Sambharama which forms its salient geographical feature. The documented history of Gujarat begins with the Mauryan period, but no particular reference to the Sabar Kantha district as such available until up to the Kshatrapa period (circa 85-400 A.D.). The Junagadh Rock Inscription of King Mahakshatrap Rudradaman I dated the year 150 A.D. alludes to Sambharama among the territories under his sway. The Chinese pilgrim Hu en Tsiang (640 A.D.) mentions a region named Atali, the headquarters, of which probably represented by Vadali near Idar. Soon after the fall of Valabhi, Rashtrakutas in South Gujarat extended their sway over the district. The district had been under the power of Parmar dynasty of Malwa. After the death of King Bhoja Parmar of Malwa, the district was under of Chalukyas of Anhilwad Patan (1054-55 A.D.)

Idar is said to have been rebounded by Parihar Rajputs who, subject to Chitor, ruled there for several generations. Towards the close of the twelfth century, the Idar chief took part with Prithviraj, King of Delhi, in the battle against the musalman invaders of India, and was killed in the battle of Thanesar (1193). Idar then fell in to the hands of a Koli named Hathi, Sod, was succeeded by his name Sonangji, who took possession of Idar and became the founder of the dynasty of the Raos who ruled there several generations. The town Idar is the picturesquely situated at the foot of Idargadh, a rocky hill, about 500 high towering over the town. The strength of the fort on the hill is proverbial. To take Idargadh is to achieve the impossible'. The Vijaynagar is predominately inhabited by forest and surrounded by hills. About 8 miles away from Vijaynagar, near Abhapur are the scattered ruins of a number of old temples dedicated to Shiva, Mahavir, Sun etc. The temple of Sarneshwer Mahadev constructed in the year 1100 A.D. was devastated by Alaf Khan, the brother of Allaudin Khilji at the time of his invasion on Patan. It has beautiful sculptures carved all round. The temple is conserved by the State Archaeological Department

The Sultan Ahmed I (the first) established Himatnagar in 1426 AD to put a control on the political Activities of the Rao of Idar. The sultan loved the place so much that it was renamed as Ahmednagar from the name of the sultan. Thereafter, in 1848 AD, it was again handed over to the kingdom of Idar and got re-christened to its current name Himatnagar, derived from Himatsinhji, the ruler of the state in those times.

The district previously belonged Mahi Kantha Agency. In 1948, it was named as Mahi Kantha district. However, as the Mahi River did not traverse the district, the name Mahi Kantha district was misnomer. The name Mahi Kantha was changed into Sabar Kantha as a result of agitation by Social Workers.

The district came into existence in August 1949 on account of the merger of 29 princely States and Estates and Prantij taluka and Modasa of the former Ahmedabad district in the then Bombay State. Ambaliara, Mohanpur, Malpur, Bayad and other States of Sarda division of the former Western India States Agency were merged in this district.

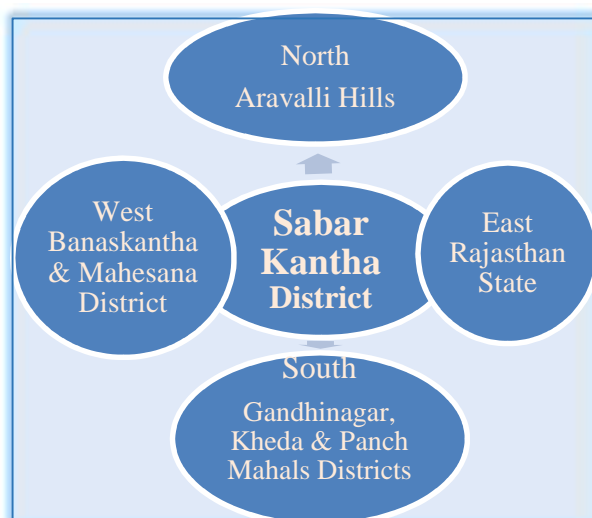

In November, 1956, the States were reorganised and the bigger bilingual State of Bombay was formed with Vidarbha, Marathawada, Saurashtra and Kachchh regions and Sabar Kantha district became a part of the bigger bilingual State.

Lastly the Bombay State was bifurcated on 1st May, 1960 and separate States of Gujarat and Maharashtra were formed. Since that date, the Sabar Kantha district became a part of Gujarat State.

ANALYTICAL NOTE

(i) Physical Features

Sabar Kantha district is situated in the northern part of the Gujarat state. District headquarter is Himatnagar. It lies between the parallels of latitude 23° 2' and 24° 30' and the meridians of longitude 72° 45' and 73° 40'. The length from north to south of this territory is about 160.2 km and from east to west about 93.7 km. It is bounded on the east and north-east by Rajasthan State, on the west by the Banas Kantha district and Mahesana district, on the south by Gandhinagar, Kheda and Panch Mahals districts. The western side of this district is bounded by the river Sabarmati, whereas the Aravalli hills form a natural boundary on the northern and eastern sides. The geographical area covered by the district is 7394.00 sq. km, which is 3.8 % of the Gujarat state. The district has been divided into 13 talukas, 15 towns and 1376 villages, with total population 24,28,589 and density of 328 persons per sq. km against the density of the Gujarat is 308 and the rank of this district is 11th in comparison to other districts of the state.

Physiography

Sabar Kantha district is a part of Gujarat Plain and is subdivided into 5 sub micro regions, namely Idar Upland, Sabar Kantha Aravalli, Sabarmati Plain, Vatrak Meshwa and Majham Plain and lastly Khari Plain on the basis of physiography, climate, geology, soils and natural vegetation. The Aravalli range of hills cover the district in its northern and eastern borders and takes a southward turn at the border of the district.

(1) Idar Upland

The region spreads over the north-western part of the district covering major part of Idar taluka and some parts of Khedbrahma and Himatnagar taluka. It is enclosed by Sabarmati Plain from three sides whereas Mahesana district bounds it from the western side. The north-eastern part of this region is relatively higher having an altitude of 200 meters above M.S.L. The elevation in remaining portion of the region is 100 meters above M.S.L. The geological structure of this region pertains to alluvium, blown sand, Erinpura Granite and Delhi System formations, etc.

(2) Sabar Kantha Aravalli

This region covers northern and eastern parts of the district which run along the Rajasthan border. The region occupies Vijaynagar, Bhiloda and Meghraj taluka and some parts of Khedbrahma, Idar, Himatnagar, Modasa and Malpur taluka. It makes its limits with Rajasthan state in the north, Panch Mahals district in the east, Kheda district in the southland Idar Upland and Vatrak Meshwa and Majham Plain in the west and south-west. The topography

of this region comprises of high hills and valleys. The elevation of this region varies between 200 and 500 meters above M.S.L. Vijaynagar attains the maximum height in this region. Vijaynagar and Khedbrahma have thick forest cover. The geology of this region is mainly composed of Aravalli and associated rocks and Delhi System formations.

(3) Sabarmati Plain

This plain falls in the south-western part of the district and covers parts of Idar, Himatnagar and Prantij taluka. It is enclosed by Mahesana district from west, by Idar Upland from north, by Sabar Kantha Aravalli from east and by Khari Plain from south-east. Gandhinagar district also touches this region. As regards the relief, the general elevation of the region is 100 meters above M.S.L. The geology pertains to alluvium, blown sand, etc.

(4) Vatrak Meshwa and Majham Plain

This region covers the south-central part of the district, occupying Himatnagar, Modasa Prantij, Bhiloda, Malpur and Bayad taluka. It is surrounded by Idar Upland from north and east, by Kheda district from south and by Sabarmati Plain and Khari Plain from west. The general elevation of the region is 100 meters above M.S.L. and in the northern part of the region has some hillocks. These are covered with forests. The geological structure of the region consists mainly of alluvium, blown sand etc. and Aravalli and associated rocks. Some tracts of Deccan Trap, Intra-Trappe and Lameta Beds, Erinpura Granite and Delhi System are also observed.

(5) Khari Plain

This region lies in the south-western part of the district and occupies part of Prantij taluka. It makes its limits with Vatrak Meshwa and Majham Plain in the north and east, Gandhinagar district in the southland Sabarmati Plain in the west. The general elevation of the region is 100 meters above M.S.L. Geologically, the region is composed of alluvium, blown sand etc.

Hills

More rugged and formidable are the highlands occupying parts of the Sabar Kantha district. The Sabar Kantha highlands are formed by the Aravalli hills and drained by the river Sabarmati and its tributaries. The ranges of Aravalli hills which take a southern turn on the border of the district form a natural boundary. The hills are mainly situated on the northern and eastern portions as stated above. The highest elevation reached is about 800 ft. The hills are a part of the chain of Aravalli hills which are found as long continuous strips of detached hills. The hills of these ranges are interlinked by either ravines or indentations or form a long continuous chain. A bird's eye-view of these hills reveals a picturesque surrounding being rugged region broken by numerous great rounded or pointed hill masses with occasional steep falls or by smaller hillocks.

Drainage

This district at present is traversed by seven perennial rivers, viz. the Sabarmati, the Hathmati, the Meshvo, the Mazum, the Vatrak, the Harnav and the Khari.

In addition to the perennial rivers mentioned above there are number of small other rivers in the district such as the Indrasi, the Sai, the Guhai, the Vakal, the Vekri, the Debhoi, the Bhekai, the Sakri, the Budheli, the Kosambi and the Varansi.

(1) The Sabarmati

Sabarmati River is one of the major West flowing Interstate Rivers in India, draining into the Gulf of Khambhat. The Sabarmati River flows from north to south along the western border of the district and other rivers flow from north-east to southwest. The river Sabarmati originates from the Aravalli hills. It originates in the Mewad hills of Rajasthan State. It has a total length of over 300 km and an extensive catchment Area. It has high bank particularly in its upper reaches, where they sometimes rise to a height of 60 meters. Even in the lower parts, the river has well marked bluffs rising from 10 to 15 meters above its bed. It flows in four talukas of the district viz. Khedbrahma, Idar, Himatnagar and Prantij talukas. It is the largest and most important river of the district.

(2) The Hathmati

The river Hathmati rises in the Mewad hills of Rajasthan. It passes south-west for about 56 km through the district, falling into the Sabarmati near the Moyad. Alike the river Sabarmati throughout the year, It passes between high rough banks, first over a rocky bed and then through a sandy bed. Between 1869 A.D. and 1873 A.D., a weir was built across the river and its surplus water which was not required for the use of the people of Himatnagar and other places was diverted. A dam near Mankdi (Bhiloda taluka) has been constructed in the year 1966 A.D and its water used for irrigation purposes. The River passes through three talukas of the district, viz. Bhiloda, Himatnagar and Prantij. Two earthen dams have been constructed on the river Hathmati.

(3) The Meshvo

The Meshvo River originates in the Mewad hills of Rajasthan. It runs parallel to the river Khari and after a course of about 202.77 km joins the river Vatrak near Kheda. In Sabar Kantha district it passes through three talukas viz. Bhiloda, Modasa and Prantij. One earthen dam across the river Meshvo near Shamlaji in Bhiloda taluka has been constructed.

(4) The Mazum

The river Mazum rises in the hills of the Dungarpur district of Rajasthan. After traversing about 25.73 km south-west through Modasa and Vadgam joins the river Vatrak near village Ambaliyara of Bayad taluka. Its bed is rocky in many places. The river passes through three talukas of the district viz. Meghraj, Modasa and Bayad.

(5) The Vatrak

The river Vatrak originates in the hills of Dungarpur of Rajasthan and enters the district near village Moydi of Meghraj taluka and runs in the south-west direction of the district. It is joined by the river Mazum and other streams. After a course of 243 km it falls into the Sabarmati near Dholka. In eastern part of its course it flows over a rocky bed between rough banks. Before entering the district, it covers a distance of about 29 km in Rajasthan. It covers a total length of about 84 km in the district. It passes through two talukas of the district, viz. Meghraj and Bayad talukas.

(6) The Harnav

The river Harnav rises in the Malwa hills of Rajasthan. It enters the district near the village Khokhra in the Vijaynagar taluka. It passes through rocky and forest areas after a course of 61 km. It meets the river Sabarmati near the village Marvada. The River passes through three talukas of the district: namely, Vijaynagar, Khedbrahma and Idar. A weir was built near Sharneshwar of the Vijaynagar mahal for the purpose of irrigation. At present the weir is not properly maintained.

(7) The Khari

The river is a small stream which rises in the center of the district. It joins the Sabarmati near the village Dholka. It passes through the Prantij taluka of the district.

(8) The Indrasi

The Indrasi is also a small stream in the district and it originates in the hills situated near the village Vagheshvari in the Bhiloda taluka. The villages touched by it are: Vagheshvari, Kishangadh, Lilchha and Mau, Khapreta, Meru, Medi Timba, Naroda and Mankdi. The Government has constructed a dam near village Mankdi.

(9) The Sai

The river Sai rises in the Aravalli hills. It passes through Poshina, Salera, Chandrana and Ambamahuda of the Khedbrahma taluka. After a course of 103 km, it meets the river Sabarmati near village Gholwada (Khedbrahma taluka). It flows for about 40 km in the district.

(10) The Guhai

The river Guhai starts from the village Medh in Idar taluka. It passes through the villages of Bhutiya Detroli, Badoli, Budhuya, Kukadiya, Sherpur, Ankala and Bhadresar of the Idar taluka and Dholpur, Khandhol, Vasna, Rampur and Balochpur of the Himatnagar taluka. Its total length is 38.62 kms. The river meets the Hathmati River near the village Balochpur.

(11) The Vakal

The river Vakal rises in the Aravalli hills. After traversing a course of 157.71 kms. It meets the river Sabarmati at 64.37 km of its course. The river flows for about 32 km in the district.

(12) The Vekri

The Vekri River also issues from the Aravalli hills. It passes by the village of Gajipur Chandap, Vartol, Veda and Kamboya of Idar taluka. It meets the river Sabarmati at 154.49 km of its course. It flows for about 20.92 km in the district. This is another river Vekri which originates from the hills near Idar and flows by Mathasur and meets the river Guhai at Naraneshwar temple in Lalpur village in the Idar taluka.

(13) The Debhol

The Debhol River issues from the Idar hills and passes by the village Jadar of Idar taluka and enters the Himatnagar taluka of the district.

(14) The Bhikai (Bhenska)

The river Bhikai originates from the hills near the village Mudeti of Idar taluka and passes by Kanpur and Chitroda villages and meets the river Guhai (Ghauav) at Sabli village of Idar taluka.

(15) The Sakri

The river Sakri is a tributary of the Mazum River. At Munshivada village it gets separated and one of its courses touches the village Sakaria. The river is, therefore, called Sakri River. Thereafter it flows past Bherunda, Dolpur and Bhensawada villages of Modasa taluka and meets the river Mazum at Bhensawada village.

(16) The Budheli

The river Budheli originates from the Aravalli hills in Rajasthan and flows past the villages of Budheli, Torda, Takatula and Golvani of the Bhiloda taluka and meets the river Hathmati at Chiboda village of the Bhiloda taluka.

(17) The Kosambi

The Kosambi River passes through Khedbramha taluka and meets the river Harnav at Khedbramha. The villages touched by it in the taluka are Khedva and Basol.

(18) The Varansi

The river Varansi comes from the village Virpur of the Kheda district and flows through Bayad taluka and meets the river Vatrak at Kapadvanj.

Climate

The climate of the district is extremely hot in summer and severely cold during winter. The year may be divided into four seasons. The cold season from December to February followed by the hot season which lasts up to about the middle of June. The south-west monsoon seasons from the middle of June to about the end of September. October and November constitute the post monsoon or retreating monsoon season.

The district has arid and semi-arid climate with three distinguished season i.e., kharif (June to September), winter (October to January) and summer (February to May). The district receives the rainfall through South-West monsoon which normally starts from last week of June, July and August are the months of heavy rainfall.

(1) Temperature

The temperature varies from 6⁰C to 43⁰C. The December and January are the coldest months; while April and May are the hottest months of the year.

The above chart shows monthly maximum and minimum temperature in the district for the years 2011. It can be seen that maximum temperature in the district reaches to 45.2⁰ centigrade in June; while minimum temperature in the district reaches to 11.3⁰ centigrade in January.

(2) Winds

The monsoon in this district is generally accompanied by gusty winds. Winds are generally light with some strengthening in force during the latter part of the summer and early

monsoon season. During the period April to September winds are mainly from directions between south and west. In October winds are light and variable in direction from east and north-east directions being more common in the morning and from west and north-west direction are more common in the afternoon. In the period November to March, winds in the mornings are mostly from directions between east and north, while in the afternoon they are generally from directions between west and north.

Special weather phenomena during the monsoon months, depressions from the Bay of Bengal affect the weather over the district causing widespread heavy rain gusty winds. Thunderstorms occur during the period March to October.

(3) Rainfall

The monsoon generally sets during the second week of June and lasts up to about the second week of September. The following statement shows year wise average rainfall of district from 2001 to 2011.

(2) Comprehensive-District Agriculture Plan of Kheda, Directorate of Agriculture.

The above graph indicates rainfall from the year 2001 to 2011, in the year 2006 there is maximum rainfall found, which is 1721 mm, while in the year and in the year 2002 there is minimum rainfall found, which is 431 mm. The average rainfall during the year 2001 to 2011 is 908 mm.

Economic Resources

Economic resources are an important means of subsistence for the working people of the district. The details about economic resources are given here.

(1) Forestry

According to the figures available from the Forest Department for the years 2010-11, out of the total area of 7394.00 sq. km of the district, an area of about 1266.38 sq. km is covered by forest. It accounts for 6.61 percent of the total forest area of the state. The forest area of the district constitutes 6.92 percent of total geographical area of the district. Out of the total forest area of the district, 725.41 sq. km are reserved forest, 1.22 sq. km are protected forest and 539.75 sq. km is unclassified forest. Forest worth is found

only on hillocks. Important forest products found in this district are bamboos, mahuda flowers, tendu leaves, honey, herbal medicines, awal bark, puhar seeds, rayan fruits, sitafal, kadayau and other gums.

- **Agro-forestry**

Sabar Kantha district has 17.12 percent area under forest of the total area. The forest department has been engaged in planting the new trees to increase the area under forest since two decades. A special mission of social forestry has been started in the district to increase the area under forest. However, the area under forest has not crossed the desired level (20%). To increase the farm income in long run and proper ecological balance it is needed to grow more forest trees on the farmers' fields.

The above table shows the classification of forest area of Sabar Kantha district. Sabar Kantha district is mainly classified into three types of forest area; one is reserved forest, second is protected forest and third is unclassified forest. Out of total forest area 57.28% area is used for reserved forest.

(2) Minerals and Mining

Asbestos and steatite are found in association with ultramafic intrusive into the Aravalli met sediments. The main occurrences are in the Kundol Vally (Devnimori, Kundol, Isri), south of Dadhalia, Bhanmer and Thuravas.

In Kundol valley, fractures are the main controls for the formation of steatite and asbestos. Steatite is formed within the ultramafic rock, while asbestos is found in the actinolite-schist near its contact with the ultramafic rock. At found, the major shear fractures are aligned north 25° west to north-west with vertical to steep dips towards east-north-east to north-east. Veins of flaky talc, 5-8 cms, in width, of light green colour are confined to such fracture, while steatite of light grey to pale blue colour is soft. Homogeneous in texture and occurs in bulk. Tests have shown that the steatite can be sawn into desired shapes, drilled and threaded. The asbestos is of amphibole variety, showing the slip and the cross fiber, but extremely brittle and of very low fiber strength.

Above statement shows mineral production in the Sabar Kantha district for the years 2005-06 to 2010-11. It can be seen that China Clay (Crude), China Clay (Refined), Bauxite and Silica stone have been the major mineral products of the district. The production from Bauxite significantly increased during the years 2005-06 to 2008-09 but from 2008-09 to 2010-11 it was drastically decreased. Total mineral production of the district increased for the years 2005-06 to 2008-09 but after 2008-09 it shows decreasing trend.

(3) Soil and Cropping Pattern

The Sandy, goradu and medium black are the three main types of soils found in almost all the talukas. However, the sandy soil is chiefly found in Modasa, Meghraj, Malpur, Himatnagar, Bhiloda and Idar. The goradu land is found in Modasa, Prantij, Himatnagar, Bhiloda and Malpur and the medium black soil is found in Khedbrahma, Vijaynagar, Bayad, Bhiloda and Idar.

(a) Soil

The soil of Sabar Kantha district in general posses' neutral pH. Electric conductivity is medium. Organic carbon and nitrogen content of the soil is low. Phosphorus contest of the soil is medium and potash is high. Part of Idar and Vadali talukas is composed of under rock soil and hence is shallow in depth with poor percolation of water. The predomination soil track is loamy (50.83%) though medium black, sandy and black comprised 23.10, 17.20 and 8.67 percent respectively. So, overall, the soil fertility indices indicate that soil health may be improved by increasing nitrogen content.

(b) Cropping Pattern

The cropping pattern, which existed before the turn of the century has been described as under in different terms:

The crops grown are of cereals: rice, dangar, *oryza sativa*; wheat, ghau, *triticum aestivum*; maize, makai, *zea mays*; barley jav, *hordeum hexastichon*, millet; bajri, *penicilaria spicata*; indian millet, juvar, *sorghum vulgare*; kang, *panicum italicum*; banti, *panicum spictum*; bavto, *penicum frumentaceus*; kodra, *paspalum sceobiculatum*; and cheno, *panicum miliaceum*. Of pulses: adad, *phaseolus mungo*; mag, *phaseolus radiates*; chana, *cicer arietinum*.

(4) Land and Land use Pattern

Sabar Kantha district ranks 11th in comparison to other districts of the state. Cotton, castor, maize, groundnut and pigeon pea are the main Kharif crops and wheat, maize, mustard and vegetables are the main Rabi crops grown in the district.

Area, Production and Productivity of Different Crops of the District During the Year 2010-11

Above table shows the Land classification of rural areas. Forest land in the district is 96718.46 hectares. We see that in the district 13.83% area is covered under the forest area and 36.61% is covered under the irrigation and 25.76 % area is un-irrigated.

(5) Tenancy

There was no separate Act on tenancy in the former Bombay State before 1939. There were provisions of Section 83 of Land Revenue Code and Mamlatdar Court law only. The tenant was not secured of his tenancy rights in the Act. This tenancy lease was considered yearly and had to pay tenancy as per tradition or according to the agreement made with the land owner. In order to protect the tenants, the Bombay Tenancy Act, 1939 came into force in the erstwhile Bombay State.

After the independence of the country, it was necessary that the country is self-sufficient in agricultural production. It can be done only when the tillers of the land should have some definite rights over the land. With a view to effect control on efficient utilization of agricultural land and also to protect the tenants further and also to accept a definite policy and view for the country on agricultural land, The Bombay Tenancy and Agricultural Land Act, 1948 was enacted and it was brought into force since then.

The Act of 1948 was amended five times. An important provision of 'Farmer Day' was inserted in the Act on Dt.01-08-1956. According to this provision, if any person legally tilled the land of other person on Dt.01-04-1957, he was entitled to purchase the said land. Even though Gujarat State was bifurcated from Bombay State in 1960, the said act applied to it also as well.

Tenant means the person who held land on lease viz.

- (1) Tenant as per Section 4;
- (2) Protected tenant
- (3) Permanent tenant
- (4) The person who continued to possess the land with or without the consent of the land owner after appointed date and up to specified date or it is considered that he continued the possession of the land.

In Gujarat 10,26,635.6 hectares of land have been released and distributed to total 12,61,758 beneficiaries under the Bombay Tenancy and Agricultural Land Act, 1948. Among the beneficiaries, 1,74,366 were from Scheduled Castes, 279672 from Scheduled Tribes and 8,07,720 from others category.

In case of Sabar Kantha district, in all 13,734.4 hectares of land have been released and distributed to total 13,266 beneficiaries. Among the beneficiaries, 2,193 Scheduled Castes were allotted 2412.8 hectares of land, 1,019 Scheduled Tribes were allotted 1101.6 hectares of land and 10054 beneficiaries under 'others' category were allotted 10220 hectares of land.

(6) Agriculture

Livelihood of millions of people of India depends on agriculture which by and large, influenced by locally available natural resources. "Krishi Mahotsav" in Gujarat launched on the auspicious occasion of Akshay Tithi every year. It brought about revolution of sorts in a predominantly agrarian country like India. The month-long Mahotsav, covered all the villages of each district and creating awareness about the advantage of standard seeds and its optimum use.

In Sabar Kantha as in other districts of Gujarat, agriculture happens to be the main source of subsistence for the majority of people. According to the 2011 Census, 64.57 percent of the total working population of the district was engaged in agriculture, as against 49.61 percent in the State as a whole. The table that follows gives the number of persons working as cultivators and agricultural labourers in 2011.

Number of Persons Working as Cultivators and Agricultural Labourers in 2011

Agriculture is still the main occupation of the large number of the people in the district though the shift in the land use of agriculture sector to non-agriculture sector has been increased in district. The main thrust of the district is to increase the profitability of the farmers by way of sustainable agriculture and the judicious use of natural scarce resources like water. It is the need of the hour to go for the overall development of the farmers, rural youths and rural women by updating their knowledge level through various extension activities. The main thrust of the district is to give special emphasis on the women empowerment and the establishment of small and large dairies to meet out the growing demands of the processed foods, milk and milk products and other items. About 21 percent population of the district is tribal and residing in hilly range of Aravalli Mountains.

From the above table we observe that in all horticultural crops production and area which use for that production for flower crops and vegetable crops are continuously increasing in last 4 years. Average production of vegetable crops in last four years is 527693 M.T which is highest in all horticultural crops and average production of flower crops is 363 M.T which is lowest among all crops in last four years.

From the table we can see that in last 4 years average productivity of vegetables crops is 24.49 M.T/Hec and spices crops is 1.82 M.T/Hec which high and less in among all horticultural crops respectively. If we see the average area used for production of different types of horticultural crops, then the average area used for vegetables crops is 21229 hectares; which is highest and flower crops used average area is 54 hectares; which is lowest among all crops in last 4 years.

(7) Irrigation

The district has good water resources in the form of seven rivers viz. Sabarmati, Hathmati, Khari, Meshvo, Vatrak, Mazum and Harnav. The district also has good numbers of water reservoirs/ dams like Dharoi, Hathmati, Meshvo, Vanaj, Vatrak, Guhai, Vaidi, Harnav 1&2. The prestigious Sujalam Suflam Project also benefits the district and has helped in improving the water table and flow of the tube wells. 26 percent of the cultivated area is irrigated.

(a) Area Irrigated by Crops

The area under “Crop wise total cropped area and Irrigated for the years 2007-08” is indicated in the following statement.

Crop wise Total Cropped Area and Irrigated Area for the Year 2007-08

Source: Irrigation in Gujarat 2011-12, Directorate of Economics and Statistics.

Above chart shows that for the condiments and spices, out of total cropped area 98.00% area is irrigated, followed by 56.29% for non food crops, 50.95% for cereals, 37.03% for oil seeds and 12.79% for pulses.

(b) Area Irrigated by source

The irrigated area is broadly classified into four classification namely irrigation by (a) canal (b) tank (c) well (including tube well) and (d) other sources (like Khet talavadi, Boribandh, Check dam etc.)

The areas irrigated by different sources in the district are presented below for the year 2001-02 to 2009-10.

(9) Fisheries

The fisheries sector has played an important role in the national economy through food supply, employment generation and income. Sabar Kantha district has great potential for development of inland fisheries as most of the taluka of the district are connected by river, canals and reservoirs. Bordered by the famous river Sabarmati at the north-west and western side of the district and existence of small rivers like the Varasi, the Vatrak, the Mazum, the Meshvo in the district, there is potential for the development of inland fisheries. The important fishing centers of the district are Prantij and Himatnagar. The varieties of fish available in the district are cattle, bawas, rohu, nagari, bilgi, begado, mangaru, katia, buta, kalavat and kauichi.

- Fisheries Development**

Fish culture is being accepted by the farmers as one of the subsidiary occupation in the district. The advantage of village pond fishery is the high cattle population in villages. Cattle visit village ponds (common practices) add cow dung to the pond results in production of natural food for fish. The productivity of village pond is high and live fish is marketed. There is wide potential for increasing production and productivity. The productivity is needed to be raised up to 7000 to 8000 kg/ha. The bottle necks of fisheries are poor infrastructure for fish seed production and genetic up gradation and lack of extension services. Different programmers/schemes have been launched by Fisheries Department to cater the needs of fish farmers. These activities are proposed to be strengthened under the plan for further development

especially the skill up gradation, fingerling production and adoption of intensive/poly culture fish farming.

The below data indicates an increase in the fishing activities in the district during 2009-10.

(14) Gram Panchayats, Its Composition, Jurisdiction and Role in the Development of Village and Its Economy

The system of Panchayati Raj was introduced in the year 1963 in Gujarat State. Under this set up, the 3 tier system was introduced namely, The District Panchayat, The Taluka Panchayat and The Gram Panchayat. Gram Panchayat is an important institution of self-government. The Gram Panchayat is formed for a village or a group of villages. The Gram Panchayat is constituted for a local area with the population of less than 15000. Such local area may be revenue village or a group of revenue villages or hamlets forming part of a revenue village or such other administrative unit or part of thereof. The number of members of Gram Panchayat varies from 7 to 15. The tenure of Gram Panchayat is of five years. The people of village elect Sarpanch and Vice-Sarpanch (Up-Sarpanch) and other members of the Panchayat.

Every village Panchayat is divided into wards, i.e. smaller areas. Each ward elects a representative who is known as the Ward Member (Panch). All the members of the Gram Sabha

also elect a Sarpanch who is the Panchayat President. The Ward Panchs and the Sarpanch form the Gram Panchayat. The Gram Panchayat is elected for five years.

The Gram Panchayat has a secretary who is also the Secretary of the Gram Sabha. This person is not an elected person but is appointed by the government. The Secretary is responsible for calling the meeting of the Gram Sabha and Gram Panchayat and also for keeping a record of the proceedings.

(a) Gram Sabha

The Gram Sabha is a meeting of all adults who live in the area covered by a Panchayat. This could be only one village or a few villages. In some states, as in the example above, a village meeting is held for each village. Anyone who is 18 years old or more and who has the right to vote is a member of the Gram Sabha.

The Gram Sabha prevents the Panchayat from doing wrong things like misusing money or favouring certain people. It plays an important role in keeping an eye on the elected representatives and in making them responsible to the persons who elected them.

The main work of a Gram Panchayat includes.

1. The construction and maintenance of water sources, roads, drainage School buildings and other common property resources.
2. Levying and collecting local taxes.
3. Executing government schemes related to generating employment in the village.

(b) Sources of funds for the Panchayat

1. Collection of taxes on houses, market places etc.
2. Government scheme funds received through various departments of the government through District Panchayats. Donations for community works etc.

Various committees like; Social Justice Committee and Standing Committee are formed. In the year 1993 Government of India enacted an 73rd Constitutional Amendment regarding provisions of Panchayati Raj and in light of that constitutional amendment Government of Gujarat enacted amended Panchayati Raj Act from 15th April, 1994. By this constitutional amendment, Panchayats are given constitutional status. Regular and timely election, participation of women and backward classes, formation of separate State Election Commission and rotation system in electing the heads of the various committees are other significant amendments in the act. Decentralized planning process and active participation of people is the soul of the Panchayati Raj Act. The powers for decentralized planning, implementation and development are delegated to the Panchayats.

The primary functions of the District/Taluka Panchayats are providing facilities for primary education, health, drinking water, electricity, constructions and maintenance of roads, bridges etc., maintenance of gauchars, organising relief work at the time of scarcity and drought situation, sanitation and social welfare. Arrangements for housing facilities for below poverty line people and rural development schemes are implemented by panchayats. Gram Panchayats also implement important programmes like, 'food for work' and other programmes beneficial for the local people. Thus, Panchayats play an important role in the development of village and its economy.

(ii) Census Concepts

Building

A 'Building' is generally a single structure on the ground. Usually a structure will have four walls and a roof. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, work sheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence etc. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Pucca Houses

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, Stones (duly packed with lime or cement mortar), G.I/metal/ asbestos sheets, Burnt bricks, Cement bricks, Concrete. Roof may be made of from any one of the following materials, namely, Machine-made tiles, Cement tiles, Burnt bricks, Cement bricks, Stone, Slate, G.I/Metal/Asbestos sheets, Concrete. Such houses are treated as Pucca house.

Kuchcha Houses

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, Unburnt bricks, bamboos, mud, grass, reeds, thatch, plastic /polythene, loosed packed stone, etc. Such houses are treated as Kuchcha house.

Dwelling Room

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and veranda which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census house is used as a shop or office, etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room. A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census House

A 'Census House' is a building or part of a building used or recognized as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non-residential purpose or both. If a building has a number of Flats or Blocks/Wings, which are independent of one another having separate entrances of their own from the road or a common staircase or a common courtyard leading to a main gate, these are considered as a separate Census House.

Village

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

Town/ Urban area

The data in the census are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. The urban area comprises two types of towns viz. statutory towns and Census towns. In the Census of India 2011, the definition of urban area adopted is as follows

(a) Statutory Towns

All places with a municipality, corporation, cantonment board or notified town area committee, etc. are known as statutory towns.

(b) Census Towns

All other places satisfying the following three criteria simultaneously are treated as Census Towns.

- i) A minimum population of 5,000;
- ii) At least 75 per cent of male working population engaged in non-agricultural pursuits; and
- iii) A density of population of at least 400 per sq. km. (1,000 per sq. mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 2001 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account. In addition the above stated towns, urban areas also constitute of OGs which are the parts of UAs.

Urban Agglomeration

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together with or without urban outgrowths of such towns. In some cases, railway colonies, university campuses, port areas, military camps etc. may come up near a statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town. Each such individual area by itself may not satisfy the minimum population limit to qualify it

to be treated as an independent urban unit but may qualify to be clubbed with the existing town as their continuous urban spread (i.e., an Out Growth). Each such town together with its outgrowth(s) is treated as an integrated urban area and is designated as an 'urban agglomeration'. For the purpose of delineation of Urban Agglomerations during Census of India 2011, following criteria has been adopted

- (a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town; and
- (b) The total population of an Urban Agglomeration (i.e. all the constituents put together) should not be less than 20,000 as per the 2001 Census. In varying local conditions, there were similar other combinations which have been treated as urban agglomerations satisfying the basic condition of contiguity.

Out Growth (OG)

The outgrowth is a viable unit such as a village or a hamlet or an enumeration block and clearly identifiable in terms of its boundaries and location. While determining the outgrowth of a town, it has been ensured that it possesses the urban features in terms of infrastructure and amenities such as pucca roads, electricity, taps, drainage system for disposal of waste water etc., educational institutions, post offices, medical facilities, banks etc. and physically continuous with the core town of the UA.

City

Towns with population of 100,000 and above are called cities.

Household

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen/common cooking. There may be one member households, two member households or multi-member households.

Institutional Household

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, observation homes, beggars' homes, jails, ashrams, old age homes, children homes, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2011, it was specifically mentioned that this category of households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless Household

Households who do not live in buildings or census houses but live in the open or roadside, pavements, in home pipes, under flyovers and staircases, or in the open in places of worship, man daps, railway platforms, etc., are treated as Houseless Households.

Language and Mother Tongue

As per the census concept, each language is a group of mother tongues. The census questionnaire collects information on the mother tongue of each person. Mother tongue is the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate

A person aged 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy Rate

Literacy rate of the population is defined as the percentage of literates in the age-group seven years and above. For different age-groups the percentage of literates in that age-group gives the literacy rate.

Educational Level

The highest level of education a person has completed.

Work

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. The main point to note is that the activity should be economically productive. Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main Worker

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal Worker

A person who worked for 3 months or less but less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non-Worker

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non worker'.

Cultivator

For purposes of the Census, a person is classified as cultivator if he or she is engaged in cultivation of land owned or from government or from private persons or institutions for payment in money, kind or share. Cultivation also includes effective supervision or direction in cultivation. Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the plantation crops like— tea, coffee, rubber, coconut and betel nuts (areca). The workers engaged in Plantation crops are recorded under “other workers”.

Agricultural Labourer

A person who works on another person's land for wages in cash or kind or share is regarded as an agricultural labourer. She/he has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household Industry Worker

Household industry is defined as an industry conducted by one or more members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods. The activity relate to production, processing, servicing, repairing or making and selling of goods. It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other Worker

A person, who has been engaged in some economic activities during the last year of reference period; but not as a cultivator or agricultural labourer or worker in Household Industry. The type of workers that come under this category include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests,

entertainment artists, etc. In fact, all those workers other than cultivators or agricultural labourers or household industry workers are 'Other Workers'.

Work Participation Rate

Percentage of Workers (Main + Marginal) to total population.

Population Density

Population density is the number of persons inhabited per square kilometer of the area.

Age

Age is measured in terms of the completed number of years.

Sex Ratio

Number of females per 1,000 males in a population.

(iii) Non-Census Concepts

Civic Status of Urban Units

Civic Status of a town/city is determined on the basis of Civic Administrative Authority of the town e.g., Municipal Corporation / Corporation, Municipal Committee / Municipal council, Municipality etc.

Size Class of U.A./Town

Size-class of U.A./Town is based on the population size of the U.A./Town.

U.A.s/Towns with 100,000 and above population are classified as Class I U.A.s/ Towns. Towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 to 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum Area

The Slum Areas (Improvement and Clearance) Act, 1956, which was enacted by the Central Government defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, faulty arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega City

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut-off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 million and above population have been treated as Mega cities and the same criteria of population have been adopted in 2011 census.

Concepts used in VD and TD of DCHB

1. Educational Amenities

The type of different educational facilities available in the village is given in numbers. Government and private educational facilities / institutions both are considered for this-purpose. If there are composite schools like Middle schools with Primary classes, or Secondary schools with middle classes, these are included in the number of Primary and Middle schools respectively. For example, if in a village there are two Primary schools and one Middle school with primary classes, the number of Primary schools in the village are given as three and that of Middle school as one even though there may be only three educational institutions, So also

in case of Secondary schools. For better understanding, the distinctiveness of different types of schools is depicted hereunder.

1.1 Pre-Primary (PP)

Now-a-days, the children are sent to schools at a very early stage. Lot of pre-primary schools, private schools in particular, have come up in villages and towns. These may or may not be recognized by the competent authorities. Even many Secondary schools have classes starting from pre-primary level. Pre-primary classes include Nursery, K.G., Pre-basic, Play school, etc.

1.2 Primary School (P)

Schools providing education from Standard I and upward up to and inclusive of Standard V are classified as Primary Schools.

1.3 Middle School (M)

Schools providing education from Standard VI and upward up to and inclusive of Standard VIII are classified as Middle Schools. A School with Class I to VIII is treated as two units, i.e. one Primary School and one Middle School.

1.4 Secondary School (S)

Schools providing education from Standard IX and upwards up to and inclusive of Standard X are classified as Secondary Schools. A composite school with I to X standard is treated as three separate units and counted separately under the categories of Primary School, Middle School and Secondary School.

1.5 Senior Secondary School (SS)

Schools and colleges that provide education for Standards XI and XII and first and second year of the Pre-University Course fall under this category. There are Senior Secondary Schools with Standard I and upwards up to Standard XII.

1.6 Degree College

(i) Arts/Science/Commerce

These are all educational institutions that provide post-PUC level education leading to University degree/diploma in any subject or combination of subjects and also post-graduate levels of education. The college offering courses in Arts, Science or Commerce either separately or in combination are covered under this category.

(ii) Engineering College (E)

It is a graduate/post-graduate degree college providing Bachelor of Engineering (BE) or Bachelor of Technology (B. Tech.) or post-graduate engineering degrees like M. Tech.

(iii) Medical Colleges

These are graduate/post-graduate degree colleges providing MBBS or equivalent degree in alternative medicine like Ayurveda, Unani, Homeopathy etc. or post-graduate medical degrees like M.D or equivalent in the above branches of medicine.

1.7. Management College/ Institute (MI)

It offers courses like Diploma in Management, Post-Graduate Diploma in Management, Masters of Business Administration (MBA) and specializations in different disciplines of Management like Marketing, Human Resources Development (HRD) etc.

1.8. Polytechnic (Pt)

An Institution providing certificate/diploma (not equivalent to degree) in any technical subject like engineering, vocational courses like embroidery, fashion designing etc. It may be both Government and Private.

1.9. Vocational School/ITI

It is a vocational training institute imparting trainings in specific fields acquiring necessary skill, which will make the trainees employable or create them opportunities of self-employment. Trainings offered by Industrial Training Institutes (ITI) fall under this category.

1.10. Non-formal Education/Training Centre (NFTC)

Non-vocational education centers, established by the Central and State Governments provide educational facilities to the interested persons irrespective of educational qualification, and age. These education centers are open to all.

1.11. Special School for Disabled

There are Government and Government recognized institutions/organizations engaged for providing education to different groups of disabled persons.

2. Medical Facilities

2.1 Hospital-Allopathic and Hospital-Alternative medicine

A hospital is an Institution, where sick or injured are given medical or surgical care. Bed strength differs from hospital to hospital ranging from 31 to 500 depending upon whether these are sub-district, sub-divisional or district hospitals. If there are hospitals providing facilities under different systems of medicines such as, Allopathic, Ayurveda, Unani and Homeopathy etc., these details are given separately.

(a) Allopathic

The system of medical practice, which treats disease by the use of remedies which produces effects different from those produced by the disease under treatment.

(b) Ayurveda

Ayurveda means 'Science of life'. The philosophy of Ayurveda is based on the theory of Pancha Mahabhootas (Five elements) of which all the objects and living bodies are composed of. The combination of these five elements is represented in the form of Tridosha: Vata, Pitta and Kapha. These three 'doshas' are physiological entities of living beings. Ayurveda developed into eight distinct specialties, i.e., Internal Medicine, Pediatrics, Psychiatry, Eye and ENT, Surgery, Toxicology, Geriatrics and Science of virility. Two types of treatments, Preventive and Curative, are given in Ayurveda.

(c) Unani

Treatment of Unani consists of three components, namely, preventive, primitive and curative. Unani system of medicine has been found to be efficacious in conditions like Rheumatic Arthritis. Jaundice, Filarisis, Eczema, Sinusitis and Bronchial Asthma. For the prevention of the disease and promotion of health, the Unani System emphasizes six essentials: pure air, food and water, physical movement and rest, psychic movement and rest, sleep and wakefulness and retention of useful materials and evacuation of waste materials from the body.

(d) Homoeopathy

Treatment in Homoeopathy, which is holistic in nature, focuses on an individual's response to a specific environment. Homoeopathic medicines are prepared mainly from natural substances such as plant products, minerals and animal sources. Homoeopathic medicines do not have any toxic, poisonous or side effects. Homoeopathic treatment is economical as well and has a very broad public acceptance.

2.2 Community Health Centre (CHC)

Community Health Centers are designed to provide referral health care for cases from PHC and those in need of specialist health care approaching the CHC directly. 4 PHCs are included under each CHC thus catering approximately 80,000 populations in tribal/hilly areas and 1, 20,000 populations for plain areas. CHC is a 30- bedded hospital providing specialist care in Medicine, Obstetrics and Gynecology, Surgery and Pediatrics.

2.3 Primary Health Centre (PHC)

A Primary Health Centre is the first contact point between a village community and the Government medical officer. A PHC covers a population of 20,000 in hilly, tribal or difficult areas and 30,000 populations in plain areas with 4-6 indoor/observation beds. It acts as a referral unit for 6 sub-centers. It has a medical officer and para medical staff.

2.4 Primary Health Sub- Centre (PHS)

A Primary Health Sub-centre is the first contact point between the primary health care system and the community. As per the population norms, one PHS is established for every 5,000 population in plain areas and 3,000 populations in hilly/ tribal/ desert areas. Each PHS has a sanctioned strength of one male and one female health worker.

2.5 Maternity and Child Welfare Centre (MCW)

It provides pre-natal and post-natal services for both mother and child. The services include regular check-up of pregnant women, giving folic tablets, counseling, delivery, immunization of children with check-up etc.

2.6 TB Clinic (TBC)

The diagnosis and treatment of TB are functions of the general health services and hence it is a part and parcel of Primary Health Care. Specialized units such as the District Tuberculosis Centre (DTC) act as referral centers. TB clinics are established by the Government of India under the National Tuberculosis Control Programme and implemented through a network of DTC. The DTC is the nodal point for TB control activities in the district and it also functions as a specialized referral centre. The functions of sub-district level Tuberculosis Unit (TU) are

implementation, monitoring and supervision of TB control activities in its designated geographical areas.

2.7 Health Centre

Clinic where medicine and medical supplies are dispensed. It has no in-patient facility. A clinic (or an outpatient clinic) is a small private or public health facility that is devoted to the care of outpatients, often in a community, in contrast to larger hospitals, which also treat inpatients.

2.8 Dispensary

Place where patients are treated and medicines provided but with no in-patient facility. Immunizations, MCH Services and sometimes pathological tests are carried out here. It may be of allopathic or any alternative medicine.

2.9 Veterinary Hospital

Mostly run by the State Government or local body for treatment and preventive measures against diseases of domestic animals like cows, buffaloes etc. in rural areas.

2.10 Mobile Health Clinic

These are Mobile vans well equipped with a range of health services to villages located far away from the CHCs, PHCs or any public health sources. The vans visit villages on designated days to deliver the health care services. The services generally offered are OPD, ante-natal and post-natal, B.P. examination, X-ray, ECG, Immunization, First Aid etc.

2.11 Family Welfare Centre

Check-up and counseling is provided to the pregnant and married women regarding small family norm and devices for having a small family. Temporary and permanent contraceptive devices are provided here.

2.12 Nursing Home

A nursing home is a long –term care facility licensed by the state that offers 24-hour room and board and health care services including basic and skilled nursing care, rehabilitation and a full range of other therapies, treatments and programs to old and sick people. The difference between a hospital and a nursing home is that a nursing home gives importance to convalescence from a disease while a hospital gives medical treatment for the disease.

2.13 Medicine Shop

A shop which sells drugs and medicines of any system of medicine viz. allopathic, homeopathic, ayurvedic or unani medicines, is considered as a medicine shop. Sometimes some shops and Paan shops also keep ordinary medicines, like Crocin, Burnol etc. These shops are not taken as medicine shops.

3. Drinking Water

The following are the main source of drinking water facility (i.e.) available in the village.

3.1 Tap Water Treated

This source of drinking water refers to a source of drinking water which is provided to the villagers through pipes within their premises or to the villagers through common taps (public taps/community water points) by the Government departments, local bodies, panchayats, public or private estate agencies, etc. after treatment. Such a source is treated as 'Tap water from treated source'.

3.2 Tap Water Un-treated

If the villagers are drawing drinking water through pipes either directly from a well or bore well or after pumping the well or tube well water, or the water is supplied through pipes to the households of the village or through public taps without treatment. Such a source is treated as 'Tap water from un-treated source'.

3.3 Covered Well (CW)

A well that is (1) covered on sides from run-off water (i.e., excess water from rain, snowmelt or other sources flows over the land) through a wall lining or casting that is raised above ground level on a platform that diverts spilled water away from the well and (2) covered so that bird droppings and animals cannot fall down the hole. It is considered as covered well.

3.4 Un-covered Well (UW)

A well which is (1) un-covered on sides from runoff water, (2) un-covered from bird droppings and animals; or (3) both

3.5 Hand Pump (HP)

Hand pump means where ground water is taken out manually by operating a hand pump.

3.6 Tube Well / Borehole (TW)

Tube well denotes the ground water source from where ground water is taken out through electrical or diesel pump. Spring, River/Canal, Tank/Pond/Lark are self-explanatory.

4. Community Toilet Complex

Community Toilet may be constructed and maintained by Gram Panchayats or Private NGOs like Sulabh Sauchalaya or likes.

5. Rural Sanitary Mart or Sanitary Hardware Outlet (RSM)

It is an outlet dealing with the materials, hardware and designs required for the construction of not only sanitary latrines but other sanitary facilities such as compost pit, washing platform and other sanitation and hygiene accessories required for individuals, households and the environment in the rural areas.

6. Community Bio-gas or Recycle of Waste for Productive Use

Many of the solid wastes having economic values but put for disposal can be recycled for reuse. For example, food, cow dung, leaves, vegetable, paper, wood, plastics, old cloth etc. However, some of the wastes are not recyclable. These are carbon paper, thermo coal etc. When a recyclable solid waste is subjected to decomposition, bio-gas could be produced under

favorable conditions. These systems of recycling may be there at the village level organized by Gram Panchayats with technical support from Governments or non-government organizations.

7. Communication and Transport Facilities

7.1 Post Office (PO)

Self-explanatory

7.2 Sub-Post Office (SPO)

Sub-post office includes Extra Departmental Post Offices and those providing franchise postal services and also part time services in lieu of some honorarium. The limited postal services include sale of stamps, receipt of letters and money orders and also distribution of letters.

7.3 Post & Telegraph Office (PTO)

Telegraph office is set up by the Government to enable people to send or receive telegrams. If the phonogram facility is available (though the Telegraph office may not be equipped with Morse Code Transmitters), the village is considered to be having telegraph facility.

7.4 Telephones (Landlines)

If the village is having the Public Call Office (PCO) either run by the Post Office or by individuals or by a private shop, then the village is considered to be having telephone facility.

7.5 Public Call Office (PCO)/Mobile PCO

Self-explanatory

7.6 Mobile Phone Coverage

Mobile phones are now very common particularly in urban areas. Some villages by virtue of being in close proximity to the urban areas also enjoy the benefits of the mobile phone services. Even if a few villagers avail the services of mobile phones, then the village is considered to be having access to mobile phone.

7.7 Internet Cafes/Common Service Centers (CSC)

If the village is having the facility of Cyber Cafes or shops owned by private individuals providing the facility of surfing of the internet, then the village is considered to be having access to internet/cyber cafe facility. Government of India formulated the scheme of CSC with the vision of providing all government services in an integrated manner at the door step of the citizen at an affordable cost even in the remotest corners of the country through a combination of it based as well as non-IT based services.

7.8 National Highway (NH)

These are main highways running through the length and breadth of the country. Each NH is numbered like NH-1, NH-2 for easy identification.

7.9 State Highway (SH)

These are roads of a state linking district headquarters and important cities within a State and connecting them with NHs or Highways of the neighbouring States.

7.10 Major District Roads (MDR)

These are important roads within a district, serving areas of production and markets and connecting these with each other or with the main highways.

7.11 Other District Roads (ODR)

These are roads serving rural areas of production and providing them with outlet to market centers, taluka headquarters, block development headquarters or other main roads.

7.12 Village Road

The approach to village refers to the state of road etc., leading to the village. This is to see whether the village is approachable both in fair and foul weather, and whether it is inaccessible only for some time in the year.

7.13. Black-Topped (Pucca) Road (BTR)

A road provided with a bituminous surfacing.

7.14 Gravel (Kachcha) Road (GR)

A road constructed using well compacted crushed rock or gravel material (coarse sand, small stones), which is fairly resilient and does not become slippery when wet.

7.15 Water Bound Macadam (WBM)

This is the road layer made of crushed or broken mixture of sand and rock fragments mechanically interlocked by rolling and voids filled with screening and binding material with the assistance of water.

7.16 Foot Path (FP)

A trodden path for the use by pedestrians and in some cases bicycles. The Foot Paths are not suitable for vehicular traffic except bicycles in some cases. Most of the interior/forest villages are connected by Foot Paths.

8. Banks and Credit Societies

Banking facility means a place where a person can operate a bank account.

8.1 Commercial Bank (CB)

These may be banks wholly owned by the Government of India by Indian or Foreign Companies.

8.2 Cooperative Banks (Coop. B)

A co-operative bank is a financial entity which belongs to its members, who are at the same time the owners and the customers of their bank. Cooperative banks are often created by

persons belonging to the some local or professional community or sharing a common interest. These banks are registered under the Cooperative Societies Act. The cooperative banks are regulated by RBI and are covered by the Banking Regulations Act, 1949.

8.3 Agricultural Credit Society (ACS)

Major objectives of the ACS are to supply agricultural credit to meet the requirements of funds for agricultural production, the distribution of essential consumer commodities, the provision of storage and marketing facilities and for light agricultural implements and machinery.

8.4 Non-Agricultural Credit Society (NCS)

These societies include consumer cooperative societies and also credit cooperative societies of certain categories of persons like teachers, health workers, etc.

9. Miscellaneous Facilities

9.1 Self-help Group (SHG)

Self-Help Groups are groups of between 10-25 women created by either NGOs or under the SGSY (Swarnjayanti Gram Swarozgar Yojana) for the purposes of meeting local credit needs. They are sometimes called Mahila Mandals in villages.

9.2. Public Distribution System (PDS) Shop

The shops through which some essential commodities are sold by the government at subsidized rates. They may also be known as ration shops and control shops.

9.3. Mandis/Regular Market

These are those clusters of shops with or without fixed premises which are open on at least six days a week and opens at least from morning hours to dusk.

9.4. Weekly Haat

These are those clusters of shops with or without fixed premises which are open once a week.

9.5. Agricultural Marketing Society

It is a common platform to analyses the issues among all the individuals and institutions in the field of agricultural marketing.

9.6. Nutrition Centre: Integrated Child Development Services (ICDS)

The Integrated Child Development Services (ICDS) Scheme set up by the Government of India with the objective of providing following package of services to the children under 6 years and pregnant and lactating mothers in villages such as; Immunization, Health Check-up, Referral Services, Pre-school Non-formal Education and Nutrition & Health Education.

9.7. Anganwadi Centre

Each centre under the ICDS scheme is run by an Anganwadi Worker. One Anganwadi worker is appointed for specified population of the village. They are basically local women. They are assisted by Anganwadi helper. They provide pre-school non-formal education at the Centre and provide food to the children.

9.8. Accredited Social Health Activist (ASHA)

ASHA is a health activist in the community who will create awareness on health and its social determinants and mobilize the community towards local health planning and increased utilization and accountability of the existing health services. She would be a promoter of good health practices. She will also provide a minimum package of curative care as appropriate and feasible for that level and make timely referrals. She will act as a motivator of different types of health related activities. Unlike ANM, she will not be involved in any clinical activities like immunization.

9.9. Sports Club/Recreation Centre

Indoor and out-door games are arranged by the Club and activities like wrestling, Judo Karate etc. are also done there.

9.10. Cinema/Video Hall (CV)

If a regular cinema house licensed by Government is available, then the town/village is considered to be having the facility of Cinema Hall. Video hall owners screen films in their own or hired premises.

9.11. Public Library

Books are kept there which can be accessed by the public on loan basis. These may be sponsored by Government or Local Body or Panchayat or any influential person. Free service or nominal charges are made for using the facility.

9.12. Public Reading Room

Here the public may read newspapers and magazines. These may be sponsored by Government or Local Body or Panchayat or any influential person.

9.13. Newspaper Supply

The availability of the Newspaper(s), both in English or vernacular, in the village is considered to have the said facility.

10. Availability of Electricity/Power.

If power is actually available, whatever may be the form of its use, it is indicated affirmative. If the village is having electricity for domestic purposes and the residents are using the same for domestic use, then it is considered that domestic power supply is available. If the electricity authority has not given domestic supply to the households on their request and people

are using unauthorized electricity either by stealthily or misuse the supply meant for agricultural or industrial purposes, then it is not considered as availability of electricity for domestic purposes. However, if the village goes out of power due to temporary technical problems such as, transformer failures, theft of electrical equipment, etc., it is considered that electricity is available. Supply of electricity is considered available even when there is a temporary ban on new domestic connections. Connections to residential houses, bungalows, clubs, hostels and hospitals run on non-commercial basis, charitable, educational and religious institutions are included in the domestic category.

10.1 Power Supply for Domestic Use

This category includes electricity used only for domestic consumption.

10.2 Power Supply for Agricultural Use

This category includes all electricity connections given to the farmers for conducting various agricultural activities including irrigation.

10.3 Power Supply for Commercial Use

This category includes electricity connections given for workshops, industries etc. or for any commercial purposes.

10.4 Power Supply for All Uses

This category includes electricity connection is available for domestic use, agricultural use, and for any commercial purposes.

11. Land Use Pattern

The land use area of the villages is given in hectares. The land use pattern in the Village Directory conforms to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India. The Ministry has recommended the maintenance of records of land use pattern under the 9 categories as indicated in the Village Directory.

12. System of Drainage

Generally, by drainage system, we mean the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in towns, which are not provided with such underground sewerage system, it is mentioned whether it has open drainage system. There may be possibility of the town having both closed as well as open drainage systems.

13. Type of Latrines

The data on various types of latrines both public and private together are collected. The three types of latrines considered here are, Pit Latrine, Flush/Pour Flush Latrine and Service Latrine.

(i) Pit System

The latrines are attached to the pit that is dug into the ground for the reception of night soil, are reckoned as pit latrine.

(ii) Flush/Pour Flush

A flush latrine uses a cistern or holding tank for flushing water and has a water seal, which is a U-shaped pipe, below the seat or squatting pan that prevents the passage of flies and odours. A pour flush latrine uses a water seal, but unlike a flush latrine, a pour flush latrine uses water poured by hand for flushing (no cistern is used).

(iii) Service

Type of latrine from where night soil has been removed manually by scavengers. All other types of latrines are covered under “Others” category.

14. Protected Water Supply- Source and Capacity of Storage System

There are various sources of water supply and its storage system in the town.

14.1 Service Reservoir

A service reservoir is a water storage container that holds clean water after it has been treated in a water plant, and before it is piped to the end users. These containers are covered, and are designed to keep the water safe from contamination. Their main purpose is to provide a buffer within the water supply system so that water supplies can be maintained across periods of varying demand.

14.2 River Infiltration Gallery

Infiltration Galleries are capable of supplying large quantities of water, and are used where wells are unable to supply water needs, i.e. where an impermeable rock barrier affects well efficiency, or where surface water sources are too shallow for intake screens. Infiltration galleries are one or more horizontal screens placed adjacent to (on-shore), or directly underneath (bed-mounted), a surface water source.

14.3 Bore Well Pumping System

A bore well is a well of 6" to 12" in diameter drilled into the earth for retrieving water. The depth of a bore well can vary from 50 feet to 3000 feet. Water is pumped out to surface through electricity/generator.

14.4 Pressure Tank

Tank that is used to ensure consistent water pressure and for storage of water. Usually located in basement of house but sometimes (in older settings) located in well pit.

15. Road Lighting (Points)

Road lighting means the number of street lights that are maintained in the town.

16. Home Orphanage

Orphanage is the name to describe a residential institution devoted to the care of orphans—children whose parents are deceased or otherwise unable to care for them. Parents, and sometimes grandparents, are legally responsible for supporting children, but in the absence of these or other relatives willing to care for the children, they become a ward of the state, and orphanages are a way of providing for their care and housing.

17. Working Women's Hostel

These may be recognised or non-recognised by any public authority. The data on number of working women's hostels available in the town are collected with number of seats.

18. Old Age Home

There are two types of Old Age Homes in India. One is the "Free" type which cares for the destitute old people who have no one else to care for them. They are given shelter, food, clothing and medical care. The second type is the "Paid" home where care is provided for a fee. Nowadays, such "Retirement" homes have become very popular in India and they are well worth considering.

19. Stadium

A stadium is a place, or venue, for (mostly) outdoor sports, concerts or other events, consisting of a field or stage partly or completely surrounded by a structure designed to allow spectators to stand or sit and view the event.

20. Auditorium/Community Hall

These are the places where meetings, social functions etc. are organised.

(iv) 2011 Census Findings – Population and its Distribution

(a) Distribution of Population in Rural-Urban Areas

According to the 2011 Census, the total population of Sabar Kantha district is 2,428,589 comprising 1,244,231 males and 1,184,358 females. This population of the district forms 4.0 percent of the State population and rank at 8th place among the 26 districts of Gujarat state. Out of the total population of the district 85.0 percent that is 2,064,869 live in rural area while 15.0 percent, that is 363,720, live in urban area. This rural population is distributed in 1,364 villages of the district and 12 villages are uninhabited.

Talukawise Population (in %)

Source: Primary Census Abstract-2011.

The total population of Himatnagar taluka is 13.41 percent, which is higher than other talukas of the district. The total population of Vadali taluka is 3.80 percent, which is lower than other talukas of the district.

(b) Size Class and Status of Towns, Population Growth, Density, Sex Ratio, Work Participation Rate, Literacy, Availability of University Education in the District

The statement below gives the town status, size class of town and town population for fifteen towns of Sabar Kantha district for 2011 Census.

Sr. No.	Class name and Civic status of town	Size and class of town	Population
1	2	3	4
1	Khedbrahma (M)	III	25,001
2	Vijaynagar (CT)	V	6,078

Sr. No.	Class name and Civic status of town	Size and class of town	Population

• Religion

Religion forms an integral part of Indian Social system. In the pre-Independence census reports, the data on religion was being presented for 9 major religion viz. Hindu, Muslim, Christian, Sikh, Jain, Buddhist, Parsi, Jew and Others. However, since the 1951 census the data on religion has been presented for 6 major religion viz. Hindu, Muslim Christian, Sikh, Jain and Buddhist. Besides, the minor religions have been classified under the category of 'Other'. The data on religion collected and presented by the Indian Census is the basic data of intense use for the researchers, anthropologists, sociologists, demographers, administrators, planners and even for a common man.

In 2011 the Indian Census collected the religion data of the household schedule and recorded the same under the six major religions, other religions were recorded in actual as returned by the respondent and classified under the category of 'Others'. Religion not stated has been added for those persons who have not stated their religion at the time of canvassing the status of religion.

Table 20 represents the number of literates, illiterates, literacy rate by sex and male female gap in literacy rates in all the sub districts of the district. From the table we can analyze that Sabar Kantha district has a literacy rate of 76 percent. Gap in male and female literacy rates is 22 percent. Himatnagar has the highest literacy rate of 84 percent. Khedbrahma has the lowest literacy rate of 56 percent. Male female literacy gap is maximum for Vijaynagar (26%) and minimum for Himatnagar (16%). Rural urban variations in literacy rates also reflected in the table.

Table 30 represents the number and percentage of main, marginal and non-workers by sex in different sub districts of Sabar Kantha. Total workers (main + marginal) in the district are 45 percent. Percentage of male workers and female workers are 55 and 34 percent respectively. Percentage of male workers is the highest in Vadali sub district and female percentage is the highest in Malpur sub district. Percent of non-worker is the highest in Himatnagar sub district and lowest in Malpur. In case of main worker male percentage is higher whereas for marginal worker female percentage is more.

Table 33 represents distribution of workers by sex in four categories of economic activity (cultivators, agricultural labourers, household industry workers and other workers) in all the sub districts of Sabar Kantha. Percentage of cultivators and agricultural laborers are maximum in Meghraj and Vijaynagar sub district respectively. For cultivator male percentage is more whereas for agriculture laborer female percentage is greater. As a whole percentage of household industry workers is quite less as compared to other three categories, however in comparison to males female percentage is more. Percentage of other workers is highest for Himatnagar (57%) followed by Modasa (45%).

Table 34 gives distribution of workers by sex in four categories of economic activity in different CD Blocks (Rural). Percentage of cultivators is more as compared to agricultural

laborers. Rural percentage of cultivators for the district is 37 and 34 percent for agricultural laborers, 0.91 percent are household industry workers and 28 percent are other workers. Percentage of male workers as cultivators dominates the females and reverse is the situation for agricultural laborers. At the CD Block level highest percentage of cultivators and agricultural laborer are observed in Meghraj and Vijaynagar CD Block respectively. Prevalence of household industry worker is less in all the CD Blocks, however among all comparatively higher percentage is found in Bhiloda CD Block. As regard the other workers Himatnagar CD Block secures the top most position followed by Prantij CD Block.

Table 37 gives the details about the number and percentage of rural population served by different amenities. Out of total population of 2064869 persons in the district, 2052383 (99.4%) persons have educational facility. 1126114 (54.54%) population has medical facilities and all the persons have the facilities of drinking water. Post office facilities are available to 1291339 (62.54%) population. Telephone facility has reached to 2063080 (99.91%) population and 2059652 (99.75%) population of the district have transport communications facility. Banking facilities are available to 432850 (20.96%) population of the district. 982958 (47.6%) of the population have the facility of agricultural credit societies, 2031808 (98.4%) population have been provided pucca roads facility. Power supply is available to all rural population in the district.

So, from above analysis, we can say that villages have facilities like education, drinking water, telephone, transport communications, pucca road and power supply are satisfactory. But facilities like medical, post-office, banks and agricultural credit societies are not enough or satisfactory.

In the Table 39 the villages are distributed according to four ranges of the distance from the nearest statutory town along with number of villages and availability of different amenities. Out of 1,364 inhabited villages, 108 villages that are at a distance of less than 5 km from the nearest town 101 villages have some educational facilities. Out of these 108 villages; 32 villages are having medical, 43 are having post office, 107 telephone, 108 transport communications, 36 agricultural credit societies and 106 villages linked by pucca road. Only 7 villages are having facilities of Banking.

Out of total 1,364 villages, 648 villages are situated at the distance of 5 to 15 km from the statutory towns. Of these 648 villages, 633 villages are having educational facilities followed by 645 villages having transport communication, 622 villages having pucca road, 246 villages having medical facility, 250 villages having agricultural credit societies, 648 villages having telephone, 293 villages having post office while only 76 villages having banking facilities. As many as 595 villages are located at distance of 16 km and above but less than 51 km from the nearest town. Out of these 595 villages, 579 villages are having the educational facilities followed by 591 villages having transport-communication, 591 villages having telephone facilities, 200 are having medical facilities and 582 villages are linked by pucca road connectivity. Out of these villages only 48 villages are having banking facilities. 13 villages are at a distance of more than 51 kms from the nearest town and all of them have all facilities fully satisfied except medical, post-office, bank and agriculture credit society.

Here we observe that education, telephone, transport communications and pucca road amenities are available in most of the villages. But in other hand rest of the facility are not enough in this district.

Table 40 gives the distribution of villages according to different population ranges and amenities available. Out of 1364 villages, 2 villages having population of 10,000 and more in

which all of the facilities are fully satisfied to all people. There are 36 villages in population range of 5,000 to 9,999 in which all facilities are acceptable except bank, because here facility of bank is 44.44 percent rest of all facilities are more than 70 percent in this range. There are 292 villages in the population range of 2,000 to 4,999, all of which have all of the above facilities satisfactory except Bank facility which is 27.74 percent and agriculture credit society which is 52.74 percent. There are 219 villages in the population range of 1-499 persons. In that range amenities like medical, post-office, bank and agriculture credit societies not available to most of villages of this population range, rest of facilities are satisfactory.

Likewise if we can see the population in the range of 500-999 and 1000-1999, the picture is same, as in population range amenities like medical, post-office, bank and agriculture credit society are not much available in most of the villages in this population range.

Table 41 gives the detail about CD Block (Rural) wise distribution of villages according to land use. It also gives detail of total area and cultivable area available to the inhabited villages in the district. Cultivated area includes irrigated as well as unirrigated area. There are 1,364 inhabited villages in the district having a total area of 6,94,809.96 hectares. Of this 62.58 percent is cultivable and 58.74 percent of total cultivable area has got the irrigation facilities. Looking at the land use pattern at taluka level shows that Bhiloda taluka with maximum 164 villages have a total area of 69,833.11 hectares. In Bhiloda out of total area 45.27 per cent is cultivable having 70.15 percent irrigated area. 133 villages of Khedbrahma taluka cover maximum area of 78,387.92 hectares. Out of this 41.58 percent of land is cultivable having 49.21 percent irrigated area. In Vadali all 56 villages have a total area of 30,226.47 hectares. Of this 74.17 per cent is cultivable having 64.83 per cent irrigated area. From the above table it is clear that Prantij has the highest percentage of irrigated area i.e. 74.26 while only 17.40 percent of the cultivable area in Meghraj is irrigated.

(vii) Major Social and Cultural Events Natural and Administrative Developments and Significant Activities during the Decade

The major administrative development in the district during the decade is the reorganization of the district. Government of Gujarat reconstituted some districts and talukas of the State. New Talod taluka was created by separating village from Prantij and Bayad talukas while new Dhansura and Vadali talukas were created by separating villages from Modasa and Idar taluka respectively.

Cultural Heritage of Sabar Kantha

Mostly tribal people are residing in Meghraj, Bhiloda, Khedbrahma and Vijaynagar talukas of Sabar Kantha district. Out of total tribal population of Gujarat State, 5.26 percent population reside in this district. There are two types of tribal people in district. Out of them (1) Hindu tribal Dungari Garasiya (2) Wild Kathodi people which are very backward among tribal residing Vandhol, Badarkhan, Bandhana and Antar-Sumba villages of Vijaynagar taluka.

(1) Life of People

Sunvasi tribal people residing in the lap of nature of the district occupy special identity of their culture, customs, ornaments and festivals. The Government has implemented various welfare schemes under Integrated Tribal Welfare Scheme for the development of tribal People in their weaker financial and social educational sectors. As a result tribal people have started to step up towards comprehensive development in the financial, social and educational sectors. Tribal people are settled mostly in Meghraj, Bhiloda, Khedbrahma and Vijaynagar talukas of Sabar Kantha district. The people residing in the hilly ranges of Aravalli are by nature independent and brave. Of them Dungari bhils, Bhil Garasiya, Dungari Garasiya are the main communities. The hold different surname like Ninama, Bamaniya, Rathod, Aansari, Damor, Kalasva, Katra, Joshiara, Gasda, Bharada, Khanma, Palat, Gopat, Tabiyaar, Parmar, Makwana, Gamar, Dabhi etc. This communities are declared as schedule castes. Tribal people generally are staying scattered by constructing huts in their farms. Dungari bhils of Khedbrahma taluka tell their huts as Kholku, which are constructed on higher place. They construct such kholku for staying separately from the joint family after marriage. The thorny hedge surrounding the hut found. Jhampli of entrance is decorated.

Tribal people wear complete dress. The patikot of 16 haath (hands) of Dungari Bhil woman is the specialty of dress. The ornaments of woman are mainly of silver, brass and bronze. Of the ornaments of leg they wear the ring of aluminium, brass or silver. They are known as Chagothiya. They wear bangles (baloya) of silver or haathidant. Moreover, they wear glass bangles named Kavariyo. They wear Varlo or Hansali in neck which is made of silver. They wear black thread in neck to avoid bad effect. They wear Sanori of silver or brass in nose. The customs of applying Kajal in eyes this people keeps different types of tool. Arrow and bow is also found. The black hilder of katari, panidar and sharpan sword is embaded with silver.

(2) Joint Family

The Hindu family is from ancient times joint in food, worship and estate. It consists of the head of the family, his wife, their sons married and unmarried, unmarried daughters and grand children living and working together. It was the responsibility of the head of the family to marry the younger members at the proper time, offer oblations to the dead, and propitiate titular deities. The joint income of the family was spent all the members according to individual need.

(3) Food

Generally, the Hindus are vegetarian in this district. The upper class Hindus normally take two meals a day, but those doing physical work including labourers in urban areas, agriculturists, field workers and village artisans in rural areas take three meals a day-the breakfast in the morning and the full meals at noon and at night.

The food taken by the people in rural areas is very simple consisting of two or three items per meal. It is mostly confined to rotla or bread of Makai (maize), bavto or bajri, thuli, chhas, onion and chillies, which are popular and common items of food.

Only on some special occasions do they have rice, curry, vegetable or some sweet. Otherwise it is the butter milk which serves the purpose along with rotla or khichadi, which is also a popular item of food and which is generally taken in the evening by many people both in rural and urban areas.

(4) Dress

The commonest type of dress worn by males in rural areas consists of short and thick dhoti or potdi for lower part of the body while a cotton paheeran or jamo and bandi or a coat covering the upper part of the body. Among the tribal people, the dress worn by males in rural areas consists of short dhoti or potdi or langoti for lower part of the body while a cotton shirt and a bandi covering the upper part of the body. Moreover, they put on faliyun, phenta or paghadi as the typical head dress.

Elderly males of higher castes put on dhoti a kafani or paheeran of a robe and a red or which coloured safo while the younger folk have taken to trousers or pyjamas or pants with shirts or bush-shirts and tactically discarded headwear.

(5) Ornaments

In the past, there were certain ornaments which were commonly used by both males and females. Those included kanthi or doro worn round the neck, a silver kandora worn round the waist and a gold or silver ring worn on one or more of the finger. With the passage of time, men in general have ceased using these ornaments except the ring, which is now the only common ornaments for males and females both in rural and urban areas. The silver Kandora has now staged a come-back and ladies have begun to wear it on auspicious occasions.

(6) Bhavai

The bhavai provided good diversion to village-folk. Its usefulness lies in its spontaneity, its folk-lore and entertainment provided to the villagers who easily follow and enjoy and it

brings entertainment cheaply to their door-steps. After independence, efforts are, therefore, being made to revive the folk arts of the bhavai by the State aid as a form of popular entertainment. The bhavai is one of the important items in annual drama festival organized by the Gujarat State.

(7) The Hindu Festivals

The Hindus have a number of festivals all the year round. The principal festivals which are observed by almost all castes and classes in the district include the Diwali and the New Year's Day, the Makar Sankranti, the Holi, the Balev, the Navratri and the Dashera, besides the Mahashivratri, the Ram Navami and the Janmashtami which are mainly observed by the followers of the respective sects. There are a number of other festivals such as the Bhai-Bij. The Vasant Panchami, the Nag Panchami, the Rushi Panchami, the Shitla Satam, the Ganesh Chaturthi, etc., which are also popular in the district.

(8) The Muslim Festivals

In the beginning of the year comes the month of Muharram, which is held by shias in special veneration as being the month in which Imam Hussain, the son of Ail, was killed. His death is the subject of public mourning during the first ten days when fasting and self-denial are also enjoined. Shias also observe the twenty-eighth of Zilhijja as a festival of three days in memory of Baba Shuja-ud-din a fire worshipping convert to Islam, who on this day murdered the Khalifah Umar.
